The National Scientific Council on Adolescence (NSCA) is a group of researchers from across the U.S. working to integrate and disseminate scientific knowledge about adolescent development to policymakers, practitioners, and the general public. Their efforts are essential to the Center for the Developing Adolescent’s mission to improve adolescent health, education, and well-being through developmental science.

These are the current members of the NSCA and their areas of expertise.

### LEADERSHIP

**Co-Directors of the NSCA**

Jennifer Pfeifer, PhD, University of Oregon  
*Expertise: adolescent brain development, strong emotions, peer rejection, and risk-taking*

Joanna Lee Williams, PhD, Rutgers University  
*Expertise: racial and ethnic identity development, racial-ethnic diversity in schools, adolescent friendship networks*

**Co-Executive Directors of the CDA**

Andrew Fuligni, PhD, UCLA  
*Expertise: adolescent sleep, the experiences of culturally and ethnically diverse populations such as adolescents from immigrant families, and contribution*

Adriana Galván, PhD, UCLA  
*Expertise: adolescent brain development, decision making, reward sensitivity and risk-taking, and learning*
NATIONAL SCIENTIFIC COUNCIL ON ADOLESCENCE

MEMBERS

Nick Allen, PhD, University of Oregon

Expertise: adolescent mental health, the connection between digital technology use and well-being

Candice Odgers, PhD, UC Irvine

Expertise: effect of social inequalities and early adversity on children’s health with an emphasis on the role of digital technologies in development

Anthony Burrow, PhD, Cornell University

Expertise: purpose in life, positive youth development, racial and ethnic identity development

Stephen Russell, PhD, UT Austin

Expertise: adolescent sexuality, LGBT youth, parent-adolescent relationships, and gender and race/ethnic/cultural differences in health

Ron Dahl, MD, UC Berkeley

Expertise: adolescent brain development, adolescent mental health, adolescent sleep

Stacey Sterling, DrPH, MSW, Kaiser Permanente Division of Research

Expertise: health policies and interventions for adolescent physical and mental health, substance abuse, depression, anxiety, and risky sexual behavior in pediatric primary care, Adverse Childhood Experiences

Leslie Leve, PhD, University of Oregon

Expertise: youth in foster care, youth in the juvenile justice system, how biological processes combine with social factors to shape child and adolescent development

Linda Wilbrecht, PhD, UC Berkeley

Expertise: adolescent brain development, addiction, early life adversity, dopamine
NATIONAL SCIENTIFIC COUNCIL ON ADOLESCENCE

MEMBERS

Carol Worthman, PhD, Emory University

**Expertise:** anthropology, human development, brain development, biomarkers, global policy work in reproductive health and adolescent mental health

David Yeager, PhD, UT Austin

**Expertise:** education, behavior change, inequality, growth mindset, respect and belonging, purpose, resilience, how knowledge of adolescent development could change adults’ practices
